- Ensures that you browse the Internet securely and blocks malware download on your PC.
- Ever vigilant, Quick Heal AntiVirus Pro protects your data against known and emerging ransomware attacks.

Lightweight Footprint

Lightweight, yet powerful antivirus that uses minimal system resources and lets you enjoy the full power of your PC.

Ease of Use

Simple interface and optimum default security settings ensure minimal user intervention. Just install and register the product, and enjoy your secure digital world.

Best-in-class support

Toll free number, online support, and a knowledge base information platform for all your queries.

Highlights

Firewall Protection (2-Way Protection)

- Firewall Protection ensures 2-way protection and scans both incoming and outgoing Internet communication.

Full Scan

- Quick Heal AntiVirus Pro offers a couple of scan options. You can scan on demand, schedule scans, or scan certain files and folders. Full Scan initiates a complete scan of all boot records, drives, folders, files, and vulnerabilities on your computer. Once Full Scan is done, only new files are scanned in future and thus it optimizes scanning requirement.

Boot Scan

- Cleans even highly infected systems. Some viruses tend to be active if the system is running and they cannot be cleaned. Boot Time Scan starts scanning on next boot using Windows NT Boot Shell to clean stringent viruses.

Screen Locker Protection

- Dodges malwares that lock the screen preventing access to your computer rendering it useless. You can create a short-cut key combination to initiate a clean-up of your computer and remove malicious programs bypassing such attempts.

Emergency Disk

- Sometimes rootkits reappear even after anti-rootkit scanning. Hence, you can use Quick Heal Emergency Disk for complete cleaning.

Browser Protection

- Browser Protection ensures that malwares embedded in browsers do not access folders on your computer.

Hijack Restore

- Helps you restore the default settings of Internet Explorer modified by malwares, spywares, or even by you.

USB Drive Protection

- Stops autorun malware of the USB drive to curb spread of malware to your system.

Ultimate Security

Surf the online world safely

Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

Prevent Ransomware attacks

Ransomware Protection

- Keeps your data and PC safe from ransomware attacks.
- Smart data backup and restore features act as a safety net to get your valuable data back in case of a ransomware attack.

Protect against data stealing

Anti-Keylogger

- Blocks all keystrokes spyware that can record your data and send to the hacker.

Robust and proven scan engine

Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal data.

Malware Protection

- Detects all kinds of malware, viruses, worms, Trojans, and spyware that try to inflict your PC from various sources and removes them instantly.

Advance DNAScan

- Keeps an eye on all the running programs on your PC to trace any suspicious behavior. DNAScan, our indigenous and proven detection mechanism, detects new and unknown malicious threats based on behavioral classification of the documents and files.

Secure email communications

Email Protection

- Prevents malwares coming through emails.

No fear of intrusion attack

Firewall

- Protects against network attacks.

IDS/IPS

- Blocks all kinds of malware intrusion and hacking attempts. Detects and blocks Remote Desktop (RDP) brute-force attempts and IP of remote attackers.
