

**Quick Heal**

*Security Simplified*

# Quick Heal **Total Security** for Android™ Smartphones

- Anti-Theft Security
- Web Security
- Real-Time Protection
- Safe Online Banking & Shopping

# Product Highlights

Complete protection for your Android devices that simplifies security and reduces the risk of data exposure.

- » Monitor whether your personal information has ever been leaked online.
- » Enhanced Parental Control to restrict inappropriate websites and apps for your children and sends a detailed report on device usage.
- » Check if your camera or microphone is turned on by malware to violate your privacy.
- » Secure your financial transactions when you pay with smart devices.
- » Track your device in case it is lost or stolen.
- » Additional layer of device security with App Lock.
- » Optimize the device memory and clear the junk data from the device.
- » Buy individual features as add-on as per your preference.

---

## Feature List

The best mobile security that protects your mobile devices with features such as Data Breach Alert, Anti-Theft, SafePe, Parental Control, Alert on Camera and Microphone usage and more. Stay safe all the time.

### Scan Device

This flexible feature offers the following functionalities:

- » **Quick Scan** - This is an on-demand scan that starts scanning your installed apps on the device.
- » **Full Scan** - Thoroughly scans your device and memory card.
- » **Vulnerability Scan** - Certain mobile apps installed on your phone might have security vulnerabilities that hackers can take advantage of. This feature detects such vulnerabilities and brings them to your notice.
- » **Schedule Scan** - Allows to regularize scan with useful scan frequency such as scan while charging, scan once a day, once a week, or once a month.

» **Background Scan**

Provides automatic real-time virus and spyware scans with optional manual scan.

» **Scan in Background**

Minimizes the device scanning process to continue in the background to allow you to use the device freely.

## Data Breach Alert

Monitors whether your personal information such as your username, email address, password, IP address, phone number or other information has ever been leaked online.

Recommends steps to prevent any user to log in to your account and carry out any malicious activity.

## Alert on Camera and Microphone

Sometimes malware turns on the camera and microphone of your mobile device without your knowledge. This may result in sneak peak of your private life. Hence, it is important that you must ensure you know when the camera and microphone are turned on. This helps you take appropriate action, if required.

## App Lock

Lock any app on your mobile device with a PIN/pattern. App Lock adds additional layer of security and controls the app that may affect your privacy. You can lock both system and downloaded apps. It also shows a prompt before locking newly installed apps. Also, you can scramble keyboard for security of PIN usage.

## Phone Boost

This feature optimizes the device memory and clears the junk data such as the app cache files, obsolete APKs, Junk files, and thumbnail images to boost speed of the device.

## Anti-Theft

Anti-Theft prevents your device from being misused. It allows you to lock your device or erase its entire data remotely, if it gets lost or stolen. This feature offers the following layers of advanced protection to your device:

» **Remote Locking**

Makes your phone unusable if it gets lost or stolen.

» **Mobile Tracking**

Helps in locating your lost or stolen device.

» **SIM Change Notification\***

If your device's SIM is changed, the new number will send an SMS to your alternate mobile number notifying about the SIM change.

» **Block phone on SIM card change\***

If the SIM card of your smartphone is changed, Anti-Theft will lock the phone and make it unusable

» **Remote Data Wipe**

Helps you delete data on your phone remotely.

» **Auto Dial**

Allows you to discreetly make a call to your device and hear surrounding sound in case of loss or theft

» **Auto Receive Call**

Allows you to discreetly receive a call from your device and hear surrounding sound in case of loss or theft.

» **Audio Recording**

Allows you to record the surrounding sound around your device.

» **Video Recording**

Allows you to record the surrounding video around your device.

## SafePe

SafePe helps to make safe financial transactions using the banking, financial, ecommerce, or eWallets apps. SafePe checks whether the device environment is free from any malware or unknown vulnerabilities before performing any financial transaction using any app. You also receive alert if the device is at risk before performing any transaction.

## Parental Control

Parental Control helps you block malicious and potentially dangerous websites and apps for your children's safety. The feature allows you to:

- Block websites based on their categories such as adult, crime & violence, gambling, social networks, illegal software and so on.
- Block URLs of specific websites and you can also exclude certain websites from getting blocked even if their category is in the blocked list.
- Block installed apps based on their categories such as adult, social, gambling, social networks, illegal software etc. and allow specific apps to allow even from the blocked list.
- Set browser preference for strict Parental Control.
- Block Play Store to prevent kids from installing any app.
- Detailed Parental Control reports to see usage of websites and apps and schedule the reports to be sent to the registered email.

## Capture Intruder

If someone enters a wrong password 2 times consecutively (to unlock your device's lock screen), this feature will capture the snapshots of the person using the front and rear camera. It also captures date/time of the intruder along with intruder's location. It sends an email to the configured email with intruder image, location, and date and time.

## Web Security

Excellent browsing and phishing protection by blocking malicious websites. It protects your device from all the infected websites when you connect to the Internet and keeps you safe from any kind of malware and websites that try to steal your valuable data such as banking details, user credentials, and passwords.

## Pocket Alarm

Ensures pocket theft protection by instantly notifying user, if someone attempts to steal phone from the pocket

## Motion Alarm

It notifies the user instantly if the phone is moved from its current position, alerting about the possibility of a theft.

## Wi-Fi Security

Scans your mobile device and alerts you whenever it detects an unsecured Wi-Fi network. Connecting to such networks can let attackers steal your sensitive information like login ID, passwords, banking details, and other personal information.

## Secure Delete

Securely deletes confidential data to prevent their recovery by any recovery tools. This ensures complete security and confidentiality of your valuable data.

## Security Advisor

The Security Advisor guides you about the settings that affect the overall security of your smartphone and redirects you to the respective screen to change the settings. Different Security Advisor settings are:

- Accounts and Sync
- Bluetooth
- Device Memory Encryption
- Hotspot and Tethering

- Anti-Theft
- Background Scan
- Screen Lock
- Unknown App Sources
- USB Debugging
- Wi-Fi

## Privacy Advisor

Privacy Advisor notifies about the apps that could affect your privacy. It also helps you review the permissions used by these apps, and you can decide whether you want to keep the apps or not. The feature monitors apps with permissions such as:

- Access to Accounts
- Access to Contacts
- Read Identity Info
- Tracking Location
- Access to Messages
- Access to Network

## Scan App Before Download

Automatically scans apps even before you download them from the Google Play store. It also informs you whether an app is safe to install or not. If it's not, the feature displays the risks of installing the app.

## On Install App Scan

Scans newly installed apps on the device to detect and prevent threats.

## Real-time Scan

Provides automatic real-time virus and spyware scans with optional manual scan.

Ensures automatic protection from all kinds of malware threats.

- » If you have to use another memory card, the anti-virus engine scans the memory card before transferring any data.
- » Allows you to use your mobile device while the scan runs in the background.
- » Can be configured to exclude applications from scanning.
- » Can be configured to exclude folders from scanning.

## Regular Automated Virus Updates

Takes automatic virus definition updates, so that your device remains secured from new and emerging security threats.

## Remote Device Management

This feature helps you manage your lost or stolen device via Quick Heal's Remote Device Management portal. From this portal, you can perform the following actions:

- Remotely lock, unlock, and erase data from your phone.
- Track your phone's location.
- Configure Parental Control.
- Parental Control Report

\* This feature will not work on Android 10 and above OS

## System Requirements

### Supported versions of Android

- » Android 5.0 and later versions.
