Stay Secure
No Matter What You're Doing

Quick Heal Total Security (Multi-Device) gives your Mac the full-circle protection it needs—whether you're browsing the web, working on a shared network, or just checking your email. It actively guards against viruses, malware, phishing attempts, and other online threats that can compromise your data or slow you down.

You're in control

Schedule automatic scans to run when it's convenient for you—daily, weekly, or on your own custom timeline.

Customize how threats are handled with flexible rules for quarantining or backing up suspicious files.

Keep your family safe online with easy-to-set parental controls.

Stop malicious emails and spam before they even reach your inbox.

Total Security works quietly in the background—so you can focus on what matters, knowing your Mac is protected around the clock.

Quick Heal safeguards
your privacy with these powerful protections

Stay protected from viruses, malware, and other malicious threats with continuous real-time monitoring. Virus Protection actively scans your device for harmful content that may enter through email attachments, internet downloads, file transfers, or software executions.

Virus Protection

Web Security

Protect your device from online threats while you browse, bank, shop, or stream. **Web Security** blocks malicious files and unsafe websites before they can cause harm. Customize protection to your needs for a secure, seamless online experience. With built-in **Parental Control**, you can easily monitor and manage internet access, blocking inappropriate or unwanted websites.

**Stay safe,
stay in control**
every time you go online

Key Features

Mac Security

- ✔ Scan Settings
- ✔ Virus Protection
- ✔ Schedule Scans
- ✔ Exclude Files & Folders
- ✔ Quarantine & Backup

Web Security

- ✔ Browsing Protection
- ✔ Phishing Protection
- ✔ Parental Control

Email Security

- ✔ Email Protection
- ✔ Spam Protection

Key Benefits

- ✔ With **Spam Protection**, block unwanted emails, including spam, phishing attempts, and explicit content—before they reach your inbox.

- ✔ With **Email Security**, customize email filtering rules to protect against malicious or suspicious emails. Easily block messages flagged for spam or containing potential malware.

- ✔ **Quarantine & Backup** helps in safely isolating and securing infected or suspicious files. Quarantined files are encrypted and stored in a protected folder to prevent further risk.

- ✔ Perform quick or full device **scans**, including drives, network locations, USB devices, folders, or specific files. Use **Custom Scan** to target only what matters to you.

- ✔ Access detailed **reports** and usage statistics for various protection features to stay informed about your device's security status.

Product Highlights

01
Fast and highly responsive virus protection

Delivers real-time, efficient protection without slowing down your device.

02
Browsing and Phishing Protection

Blocks access to malicious and fraudulent websites, ensuring a safe online experience.

03
Advanced Email Security

Scans incoming and outgoing email traffic for malware, including infected attachments, also from Windows user.

04
MacBook Tracking

Helps locate your lost or stolen MacBook with built-in tracking functionality.

05
Cross Platform Activation

Use a single product key to activate Quick Heal on multiple Windows desktops.

06
Self-protection

Prevents unauthorized access or tampering with Quick Heal's core files and folders, ensuring uninterrupted security.

Reliable security created to

Protect your Mac

against zero-day threats, malicious software, spam and other online threats

Feature List

Mac Security

The Mac Security section on the dashboard lets you manage and customize protection settings for your files and folders.

You can:

- Set scanning preferences
- Schedule automatic scans
- Exclude specific files or folders from scanning
- Configure virus protection rules
- Manage quarantine and backup settings

This feature includes:

- Scan Settings
- Virus Protection
- Schedule Scans
- Exclude Files & Folders
- Quarantine & Backup

Web Security

Web Security protects your device from threats encountered during everyday online activities such as banking, shopping, or browsing.

You can:

- Set rules to block malicious websites and downloads
- Enable Parental Control to monitor and restrict access to inappropriate websites for children and other users

This feature includes:

- Browsing Protection
- Phishing Protection
- Parental Control

Email Security

Email Security helps protect your inbox from spam, malware, and phishing threats.

You can:

- Customize rules for incoming emails based on content and source
- Block suspicious attachments or emails that contain malware or spam
- Define specific actions to take when a threat is detected

This feature includes:

- Email Protection
- Spam Protection

Parental Control

Take control of your child's online safety with Parental Control, a smart and flexible tool designed to help parents manage internet access responsibly.

Key capabilities include:

- Website Control: Allow or block specific websites
- Category-Based Filtering: Automatically restrict entire categories of inappropriate content
- Custom Internet Schedules: Define specific time periods for internet access
- Smart Categorization: Websites are automatically classified to simplify filtering decisions

Whether you're limiting screen time or ensuring safer browsing, Parental Control gives you full control with minimal effort.

Single Product Key

Activate and manage multiple Windows installations using a single product key for seamless deployment across devices.

Detailed Feature List

- ✔ Scan Settings
- ✔ Virus Protection
- ✔ Quarantine & Backup
- ✔ Browsing Protection
- ✔ Phishing Protection
- ✔ Parental Control
- ✔ Email Security
- ✔ Spam Protection

System Requirements

To install and run Quick Heal Total Security (Multi-Device), your system must meet the following minimum requirements:

- Mac OS X 10.9, 10.10, 10.11 & macOS 10.12, 10.13, 10.14, 10.15, 11, 12, 13, 14, 15 and 26
- Processor: Intel core or Apple's M1, M2, M3, M4 chip compatible
- 512 MB of RAM
- 417 MB free hard disk space
- Internet connection to receive updates

Additional Notes on System Requirements

- The requirement is applicable only to 64-bit operating systems unless specifically mentioned.
- The requirement is applicable to all flavors of the operating system.
- The requirements provided are minimum system requirements. Quick Heal recommends your system has higher configuration than the minimum requirements to obtain best results.
- To check for the latest system requirements, visit: www.quickheal.com.

Email Scanning Support

Supported POP2 Email Clients

- The following POP3 email clients support the **Email Scanning** feature:

  - Apple Mail Ver. 10.3 and later
  - Thunder bird
  - Sparrow
  - Sea Monkey
  - MailSmith

- The following do **not support** the Email Scanning feature:

  - IMAP
  - AOL
  - POP3s with Secure Sockets Layer (SSL)
  - Web based email such as Hotmail and Yahoo! Mail
  - Lotus Notes

SSL connections not supported

Email Protection does not support encrypted email connections that use Secure Sockets Layer (SSL). If SSL connections are being used, the emails are not protected by Email Protection.
