Highlights

Browse online safely

Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

Phishing Protection

- Prevents all kinds of phishing attempts that try to steal your data. Fraudsters impersonate legitimate email notifications asking for login or banking credentials. This feature detects such attempts.

Prevent Ransomware attacks

Total Ransomware Protection

- Keeps your data and PC safe from ransomware attacks.
- Smart data backup and restore features act as a safety net to get your valuable data back in case of a ransomware attack.

Do banking & online shopping securely

Safe Banking

- Protects your credentials including bank account, username, and password during banking transactions and online shopping from getting stolen.

Anti-Keylogger

- Blocks all keystrokes spyware that can record your data and send to the hackers.

Secure confidential data

File Vault

- Allows you to create a password-protected virtual drive on your PC to secure your valuable data. Your data is stored in an encrypted format to prevent unauthorized access.

Data Theft Protection

- Blocks unauthorized copying of data from your PC to any USB drive or vice versa.

Safe family, happy family

Parental Control

- Makes Internet a healthy platform for your children. Regulates your children's access to the Internet and blocks unwanted websites and apps to protect them from offensive content and online threats. Their safety is in your own hands.

Robust scan engine

Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal data.

Malware Protection

- Detects all kinds of malware, viruses, worms, Trojans, and spyware that try to inflict your PC from various sources and removes them instantly.

Advance DNAScan

- Keeps an eye on all the running programs on your PC to trace any suspicious behavior. DNAScan, our indigenous and proven detection mechanism, detects new and unknown malicious threats based on behavioral classification of the documents and files.

Protect your privacy

Webcam Protection

- Detects and prevents applications and malwares from accessing the webcam of your PC without your consent to compromise your privacy.

Secure email communications

Email Protection

- Prevents malwares coming through emails.

Spam Protection

- Blocks spam emails and malware infected attachments.

No fear of intrusion attack

Firewall

- Protects against network attacks.

IDS/IPS

- Blocks all kinds of malware intrusion and hacking attempts. Detects and blocks Remote Desktop (RDP) brute-force attempts and IP of remote attackers.

Enhance PC performance

PCTuner

- Helps you improve the performance of your PC and protects your privacy by removing junk files, cookies, and Internet traces.
