Powered by GoDeep.AI

Smarter, faster, AI-driven  
shield against evolving  
digital threats.

Security Intelligent Assistant  
Your personal security  
guide: instant answers,  
easy help.

One login. All devices.  
Protection simplified

# Quick Heal's Next-Gen Cyber Security Solutions are powered by **GoDeep.AI**

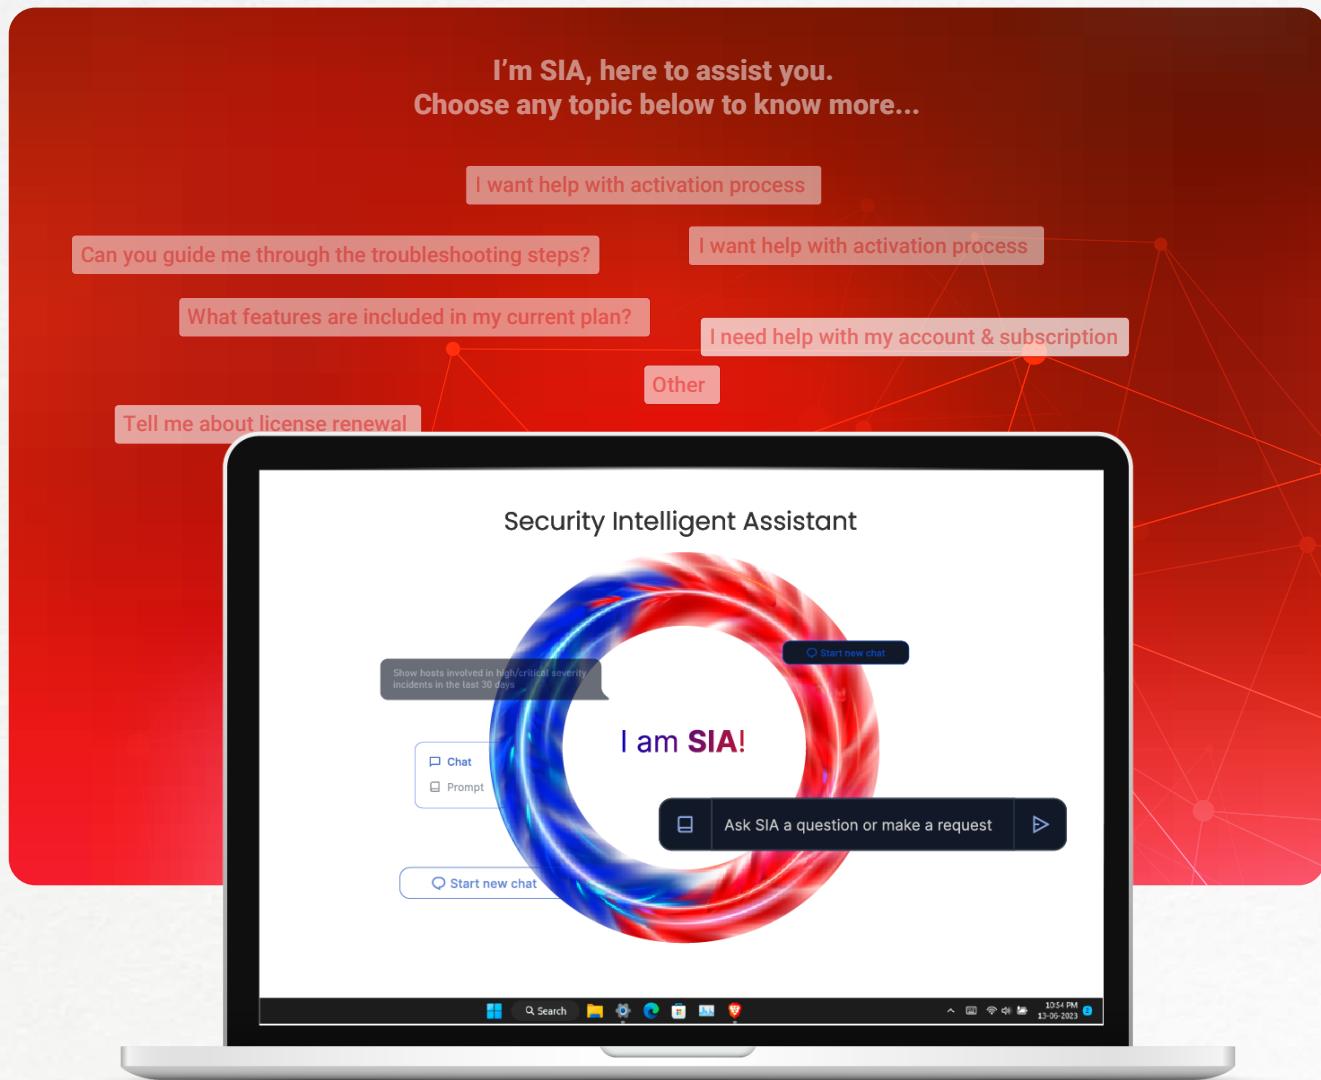

GoDeep.AI is a cutting-edge malware-hunting technology powered by Artificial Intelligence.

Our **Deep Learning** Module learns and remembers every historical malware threat and stores the learnings in a centralized cloud. It feeds the **Artificial Intelligence** algorithm to learn and evolve in real-time, providing the engine with the capabilities of **Predictive Detection**.

This algorithm works conjointly with **Behavioral Detection technology** that monitors and tracks the activities of each program. This technology further blocks the program immediately if its behavior is found suspicious. GoDeep.AI, with its advanced technology, protects users from threats that have never occurred before **Zero Day attacks**.

# SIA, Your virtual assistant

We understand that sometimes it is difficult to understand security alerts or fix technical issues, which can make it harder to use all the protection and features to their full potential that Quick Heal provides.

**SIA – your Security Assistant for a simpler, stress-free experience.**  
It provides:

## Instant Answers

Step-by-step help for common queries.

## Feature Walkthroughs

Easy instructions for using key features.

## Problem Solving

Quick fixes for all your issues.

## Product Awareness

Recognizes your product version & suggests enhancements.

## Human-like Conversations

Friendly, jargon-free explanations.

**SIA makes security simple, stress-free, and interactive.**

# Experience AI powered **Digital Privacy & Safety** with Quick Heal Antivirus Pro.

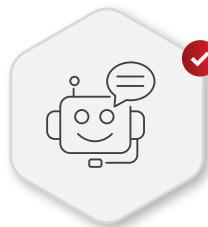

## Key Features

Security & Privacy Score

Malware Protection

SIA (Security Intelligent Assistant)

Browsing Protection

## Key Benefits:

- ✓ **SIA**, your Security Assistant for a simpler, stress-free experience.
- ✓ **Privacy-First Protection** with digital identity, personal data, and more guarded at all times.
- ✓ Smarter real-time protection with **AI-powered threat detection**.
- ✓ **metaProtect** helps you manage multiple devices, privacy alerts, fully giving you remote control from one console.
- ✓ **Fearless Digital Experience** with safe banking, fake website/apps protection, fraud prevention, ransomware defense, malware protection and more.
- ✓ **Lightweight Performance** with Antivirus that runs silently in the background without slowing down your device.

# Product Highlights

## SIA (Security Intelligent Assistant)

A built-in chatbot that answers your security queries.

Gives you alerts and fixes in simple, jargon-free language, and step by step walkthrough and solutions. Available 24 X 7.

## One login. All devices. Protection simplified

- Get a synchronized security experience across all your devices with our cloud platform.
- Map your family's devices to a single metaProtect account to manage your device security remotely and in real-time.
- Access a holistic view of your device security, privacy, and receive instant breach alerts.
- Centrally manage licensing, including renewals and upgrades, for added convenience.

### Prevent ransomware attempts

#### Ransomware Protection

- Takes a backup of your data on regular basis, so if there is any ransomware attack, you can remove ransomware and restore your data without getting affected.

### Surf the Internet safely

#### Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

### Secure email communications

#### Email Protection

- Prevents malwares coming through emails.

### Curb the possibility of virus spread

#### USB Drive Protection

- Prevents malwares coming through emails.

### Stay protected with robust scan engine

#### Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal your data.

#### Malware Protection

- Detects all kinds of malware, viruses, worms, Trojans, and spyware that try to infect your PC from various sources and removes them instantly.

## Digital Safety Made Easy

### Security Score

- Provides insight on your risk situation and security status along with helpful tips for enhancing device security.

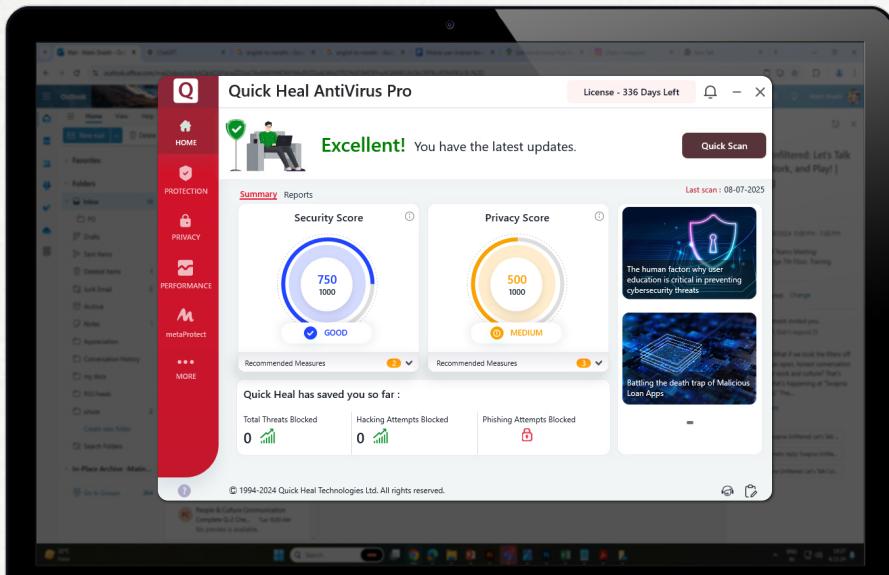

### Privacy Score

- Offers insights into your personal data risks and gives useful tips to strengthen and protect your privacy and identity in the digital world.

## Intuitive Workflows and Reports

- Get real time, easy-to-understand visual snapshots of your digital wellbeing reports, along with recommendations to improve your digital safety and online privacy.

## System Requirements

### Operating System

MS Windows 11, MS Windows 10, MS Windows 8.1, MS Windows 8 fully patched (32 and 64-bit)

### RAM

4 GB and above RAM

### Browser

Intel or AMD processor, 32-bit (x86) or 64-bit (x64), 1 GHz or higher

### Disk Space

2.7 GB or more

### Additional Requirements

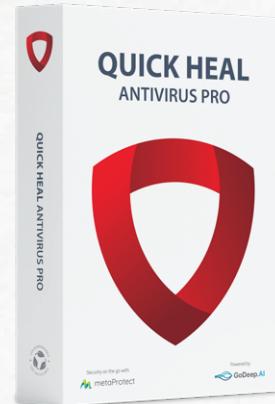

- Internet connection to receive updates and for activation
- Minimum Screen resolution 1024x768

### Display Setting

Set recommended Value for optimal app display
