Quick Heal

DATASHEET

SPOTR

FOR CREATORS

• YOUR IDENTITY IS YOUR BRAND.

Hunt . Spot . Kill.

Spotr for Creators helps you hunt for impersonation, fake profiles, copied content and misuse; spot findings through identification and alerts; and take action with account recovery and account takedown services.

01 HUNT

Hunt

Scan the web 24/7 for impersonation, fake profiles, copied content and misuse.

02 SPOT

Spot

Identify potential threats and get alerted to the findings.

03 KILL

Kill

Take action with account recovery and takedown services.

DIGITAL IDENTITY & REPUTATION PROTECTION

• REALITY CHECK

Your identity is online.
So are the risks.

Your name, your photos, your posts and your followers are what people know and trust you for. Today, anyone can copy them within minutes, and you may not find out until the damage is done.

A fake profile can cheat your followers in your name. A hacked account can lock you out of everything you have built. A fake video made with AI can put words in your mouth. And leaked personal details can be misused by strangers. To stop these threats, you need protection that keeps watching for them and helps you act quickly.

HOW YOUR IDENTITY CAN BE MISUSED

Fake profiles
can use your name and photos to cheat people who trust you.

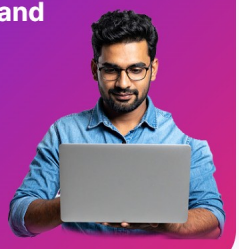

Copied content
can be reused by others, taking away your credit and confusing your audience.

Hacked accounts
can lock you out or post harmful things in your name.

Fake AI videos and voices
can make it look like you said or did something you never did.

Leaked details
like emails, phone numbers and passwords can be misused if they reach the wrong hands.

Spotr safeguards your identity and reputation.

Spotr hunts for fakes and misuse, helps you spot the threats and get alerted, and guides you to kill them by taking meaningful actions. Together, they give you visibility into hidden risks and the support you need to protect your identity, your content and your reputation online.

• FEATURE SHOWCASE

Know what's happening across your digital presence.

01 · See how people feel about you, at a glance.

Vibe Check (Sentiment Analysis)

Looks at what people are saying about you online and shows whether the comments are positive, negative or neutral on each platform. If negative talk starts to build up, you get to know early and can respond before it grows.

02 · Spot the duplicates using your name.

Fake Profile Identification

Finds profiles that use your name, photos or other details to look like you. You can enter a profile and see a match score that shows how likely it is to be a fake copy of yours. These fakes are often used to cheat your followers or audience.

03 · Stay in control of what is yours.

Account Takeover Services

Helps you notice when something is wrong with your social media accounts and guides you on what to do first, so a hacker does not get time to do more damage. You can raise a request for help and follow its progress at any time.

04 · Don't let fake videos speak for you.

Deepfake Watch

Keeps a lookout for fake videos, voices and photos made with AI that look or sound like you. Such fakes can be used to spread false messages or trick people in your name. If something suspicious is found, you are alerted so you can decide what to do.

Hunt.
Spot.
Kill.

• PRODUCT HIGHLIGHTS

Know what's happening online. Take action when it matters.

05 · Guard your web address and your inbox.

Domain and Email Monitoring

Checks the email addresses and website names you add to see if they have been exposed, or if look-alike versions are being used to pretend to be you. Cheats use these copies to fool people into sharing money or personal details.

06 · Find out if your details have been leaked.

Dark Web Monitoring

Checks whether details like your email address, name or password have shown up in leaked data on hidden parts of the internet. If they have, you will know what has been exposed and can act before someone misuses it.

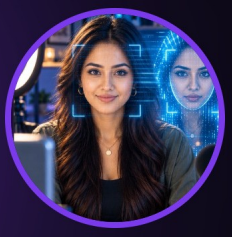

07 · Take back control. Take them down.

Account Recovery and Legal Support

If your account is hacked or locked, Spotr helps you through the steps to get it back. If someone is copying your profile or content, it guides you on asking for its removal and, where available, can send the removal request and follow up for you. You can track every request in one place.

Your identity is your brand. Keep it protected.

Connect your supported social account. Review your dashboard for monitoring checks, findings and sentiment summaries, then choose the next step that fits your needs.

• HOW IT WORKS

Hunt. Spot. Kill.

From finding potential misuse to taking action against it.

01 · HUNT

Hunt for Fake Profiles, 24/7

Scan supported sources for fake profiles, lookalikes, copied content and potential misuse of your identity. Monitoring frequency and coverage depend on your plan and supported sources.

02 · SPOT

Spot the Fakes. Uncover the Threats.

Review scan findings and alerts to identify potential impersonation, copied content, exposed information and other digital risks.

03 · KILL

Take Action. Take Them Down.

Request takedowns for fake profiles or copied content, and access account recovery support where available.

• ACCESS & ACCOUNT DETAILS

Know what you can manage

Access	Browser-based access; sign in using a mobile device or desktop.
Monitoring Inputs	Supported social profile URLs/handles, email addresses, phone numbers and business domains.
Request Status	Track requests as Submitted, In Progress, Pending, Action Needed or Closed.
