

Dr. Sanjay Katkar, Joint Managing Director, Quick Heal Technologies Limited, welcomed the digital acceleration measures. He said, “We appreciate the Government’s strong thrust on digital acceleration across services, cloud infrastructure and data centre ecosystems, which will significantly expand how enterprises, institutions and citizens engage with digital systems.”

He further noted, “The extension of tax holidays for cloud services, safe harbour frameworks for IT services, and large-scale investments across financial services, logistics, healthcare, education and tourism will lead to deeper adoption of AI-driven and data-led platforms.”

He stated, “With initiatives such as AgriStack integration with AI, digital education ecosystems, medical value tourism hubs and large-scale skilling programmes, cyber resilience becomes foundational to this growth. I am confident that with over three decades of shaping cybersecurity in India, Quick Heal and Seqrite remain committed to protecting country’s digital frontiers and enabling individuals and organisations of all sizes to remain resilient as part of the country’s digital transformation journey.”
