Shields your data from theft and your computer from malware: Quick Heal Total Shield

Key Features

- Browsing Protection
- Safe Banking
- Ransomware Protection
- Anti-Tracker

Key Benefits

- Complete Web Protection
- Lightweight on Computer
- Real-time Virus Protection
- Best-in-class Support

Product Highlights

Surf the Internet safely

Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

Phishing Protection

- Detects frivolous and phishing attempts instantly that try to steal your data in disguise. You never fall prey to data phishing.

Keep trackers of your digital footprints at bay

Anti-Tracker

- Prevents trackers that observe your online footprint and browsing behaviour to promote marketing or sales and display ads.

Pay bills, transfer money online, and do banking without fear

Safe Banking

- Protects your credentials including bank account, username, and password during banking transactions and online shopping from getting stolen.

Anti-Keylogger

- Blocks all keystrokes spyware that can record your data and send to the hackers.

Save children from inappropriate content

Parental Control

- Makes Internet a healthy platform for your children. Regulates your children's access to the Internet and blocks websites and apps with inappropriate content to protect them from online threats.

Stop espionage by webcam

Webcam Protection

- Detects and prevents applications and malwares from accessing the webcam of your PC without your consent to compromise your privacy.

Prevent ransomware attempts

Ransomware Protection

- Takes a backup of your data on regular basis, so if there is any ransomware attack, you can remove ransomware and restore your data without getting affected.

Stay protected with robust scan engine

Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal your data.

Malware Protection

- Detects all kinds of malware, viruses, worms, Trojans, and spyware that try to infect your PC from various sources and removes them instantly.

Advance DNAScan

- Keeps an eye on all the running programs on your PC to trace any suspicious behavior. DNAScan detects new and unknown malicious threats based on behavioral classification of the documents and files.
